Portfolio Website

Professional Summary

Computer Science graduate and AI Backend Engineer with hands-on experience in Agentic AI, LLM applications, LangGraph, RAG, and AI-powered backend systems. Experienced in building practical AI workflows and intelligent APIs, with a strong foundation in cloud and DevOps.

Technical Skills

Languages: Python, C++, SQL, JavaScript, HTML, CSS
AI / LLM: Agentic AI, LangGraph, RAG, LLM APIs, Langfuse
Backend / Cloud: REST APIs, AWS, Docker, NGINX, PostgreSQL, MySQL
DevOps / Tools: Git, GitHub, Jenkins, Kubernetes, Linux, Postman, VS Code, Oracle VirtualBox
Frontend: React.js, Tailwind CSS, Bootstrap, GSAP, Three.js
CS Fundamentals: Data Structures & Algorithms, OOP, Operating Systems, Networking

Projects

AI Teaching Agent (Study Guide Generator) | Python, LangGraph, Agentic AI

- Built an agentic workflow that analyzes technical roles and generates structured, personalized interview-preparation study guides.
- Designed workflows for question analysis, web-grounded research, candidate-answer evaluation and identification of weak areas.
- Uses LLM-driven workflows to convert interview requirements into structured learning paths covering key concepts, interview patterns and practical examples.

Meetily – Transcript Correction Agent | Python, LLMs, Agentic AI, APIs

- Extended Meetily's audio-to-transcript pipeline with an AI-powered correction agent to improve inaccurate Hinglish and technical-term transcriptions.
- Developed an automated workflow to identify and repair misheard terms while leaving uncertain corrections for human review.

AWS VPC Infrastructure Implementation | AWS, VPC, EC2, Networking

- Designed and implemented a custom AWS VPC architecture with public/private subnets, EC2, database server, NAT/Internet Gateway and route tables.
- Implemented multi-AZ infrastructure to demonstrate practical cloud networking, security and scalable infrastructure design.

Apple Website Clone | React, GSAP, Three.js, HTML5, CSS3 GitHub | Live

- Built a front-end clone of Apple's website featuring advanced animations and smooth 3D interactions.
- Used GSAP for scroll-triggered animations and Three.js for interactive product experiences.

Experience

AI Backend Engineer (Intern) May 2026 – Present
Azalio Technologies *Mohali, Punjab*

- Contributing to AI-powered backend systems and intelligent APIs for real-world applications.
- Worked on an AI-based transcript correction workflow to identify and repair misheard technical terms while leaving uncertain corrections unchanged.
- Designed and refined automated correction workflows involving AI self-verification and deciding when external web research is required.
- Contributed to speaker-identification and transcript-processing workflows and validated improvements using real interview recordings.

Operations and Treasurer (Student Member) August 2024 – April 2025
Eloquence Consortium – Chandigarh University *Mohali, Punjab*

- Planned and executed university-level events, technical workshops and team meetings.
- Managed fundraising, sponsorships, membership collections and operational budgets.

Education

Chandigarh University Mohali, Punjab
Bachelor of Engineering in Computer Science — CGPA: 7.63 *September 2022 – June 2026*

Achievements

- Awarded Certificate of Leadership as CR in 3rd year.
- Among Top performer in mock interview, Group Discussions and Aptitude in University.

Certifications

- **AWS Certified Cloud Practitioner (CCP)** · Python for Everybody (Coursera) · Intelligent Systems in AI (Infosys Springboard) · Introduction to Databases (Coursera) · Foundation of Cloud IoT and Edge ML (NPTEL) · Introduction to AI (IBM + Coursera) · 5G Network Fundamentals (Coursera) · React Native (Meta + Coursera)
